Basic Tutorials

Please write us an email to request access to the sources, stating **why and how** you would use the sources. We will then send you a user name and password back for connecting to our SVN server.

- <u>Download sources from SVN</u> This article describes how one would download the sources.
- <u>Install Visual Basic Express</u> Visual Basic Express is the development environment that we use to program EwE. This is required if you want to program or look into the source code of EwE.
- Run EwE6 from sources This article describes how to run the scientific interface from the sources.
- CreateaSimpleUserInterface This article will teach you how to create a Button, Label and a Textbox control.
- <u>EwE6 console application</u> This article shows how to run EwE6 from a console application.
- Run Ecosim from a console application This article shows how to run Ecosim from a console application.
- Ecosim multi threaded and Variable Timestep example This article shows how to run Ecosim on a separate thread from the interface and a variable time step.
