

Basic Tutorials

These tutorials assume that you have [access to the EwE6 sources](#), that you have [a development environment installed](#) and that your system [can handle Access 2007 database files](#).

It is also assumed that you are familiar with basic concepts of Microsoft .NET software development.

- [EwE6 console application](#) - This article shows how to run EwE6 from a console application.
- [Run Ecosim from a console application](#) - This article shows how to run Ecosim from a console application.
- [Ecosim multi threaded and Variable Timestep example](#) - This article shows how to run Ecosim on a separate thread from the interface and a variable time step.

Non-EwE related playthings:

- [Create a simple user interface](#) - This article will teach you how to create a Button, Label and a Textbox control in a Windows Forms application. But honestly, there are much better tutorials on the Internet to teach you how to program Microsoft .NET!
