Downloading the Source from SVN

This article describes how one would download the sources.

Please note, you must write us at ewedevteam@? to request permission stating **who, why and how** you would use the sources in-order to download the sources. From there, we will give you access to our SVN server.

- i. Install [?TortoiseSVN](#).
- ii. Create a folder [your path]/Ecopath_dev/Ecopath6.
- iii. Right click on the Ecopath6 folder and select SVN Checkout.

- iv. Enter the URL of Repository below and ensure the location of the folder to [your path]/Ecopath_dev/Ecopath6:

Ecopath6: [?http://sources.ecopath.org/svn/Ecopath/trunk/Ecopath6](http://sources.ecopath.org/svn/Ecopath/trunk/Ecopath6)
Click OK and enter your username and password

- i. Repeat steps 2 - 4 to with Ecopath5 to download the sources for Ecopath5.

Ecopath5: [?http://sources.ecopath.org/svn/Ecopath/trunk/Ecopath5](http://sources.ecopath.org/svn/Ecopath/trunk/Ecopath5)

A WinCVS alternative to SVN would be [?RapidSVN](#). A Visual Studio Integration to SVN would be [?ankhsvn](#).
