

Downloading the Source from CVS

This article describes how one would download the sources.

Get the code

- i. Install TortoiseSVN
- ii. Create a folder Ecopath_dev/<project_name>
- iii. Right click on the <project_name> and select SVN Checkout
- iv. Choose one of the URLs corresponding to the <project_name> and enter it in URL of Repository:

Ecopath6: [?https://sources.ecopath.org:8443/svn/Ecopath/trunk/Ecopath6](https://sources.ecopath.org:8443/svn/Ecopath/trunk/Ecopath6)

Ecopath5: [?https://sources.ecopath.org:8443/svn/Ecopath/trunk/Ecopath5](https://sources.ecopath.org:8443/svn/Ecopath/trunk/Ecopath5)

Click OK and enter your username and password

A WinCVS alternative to SVN would be RapidSVN but requires a pre-released version (9.9): [?http://www.rapidsvn.org/download/nightly/win32/](http://www.rapidsvn.org/download/nightly/win32/)
