Table of Contents

Downloading the Source from SVN

This article describes how one would download the sources.

Please note, you must write us at ewedevteam@? to request permission stating **who, why and how** you would use the sources in-order to download the sources. From there, we will give you access to our SVN server.

---

i.   Ensure you have been granted access to the SVN server via ewedevteam@?.

ii. Install ?TortoiseSVN.

iii. Create a folder [your path]/Ecopath_dev/Ecopath6.

iv. Right click on the Ecopath6 folder and select SVN Checkout.

v.   Enter the URL of Repository below and ensure the location of the folder to [your path]/Ecopath_dev/Ecopath6:

    Ecopath6: ?http://sources.ecopath.org/svn/Ecopath/trunk/Ecopath6
    Click OK and enter your username and password

i.   Repeat steps 2 - 4 to with Ecopath5 to download the sources for Ecopath5.

    Ecopath5: ?http://sources.ecopath.org/svn/Ecopath/trunk/Ecopath5

A WinCVS alternative to SVN would be ?RapidSVN. A Visual Studio Integration to SVN would be ?ankhsvn.
