

7 Using Ecopath. Part 2: Parameterization and outputs

Once you have entered the input parameters for your model you can parameterize (balance) the model (see [Notes on parameterizing an Ecopath model?](#) and [Balancing a model?](#) in this chapter). This chapter also contains the information on Ecopath's outputs ([Basic estimates?](#); [Key indices?](#); [Mortalities?](#); [Mortality coefficients?](#); [Predation mortality?](#); [Consumption?](#); [Respiration?](#); [Niche overlap?](#); [Electivity?](#); [Search rates?](#); [Fishery?](#); [Flow diagram?](#); and the [EwE Network Analysis plugin?](#))
