Table of Contents

7 Using Ecopath. Part 2: Parameterization and outputs **3**

7 Using Ecopath. Part 2: Parameterization and outputs

Once you have entered the input parameters for your model you can parameterize (balance) the model (see Notes on parameterizing an Ecopath model and Balancing a model in this chapter). This chapter also contains the information on Ecopath's outputs (Basic estimates; Key indices; Mortalities; Mortality coefficients; Predation mortality; Consumption; Respiration; Niche overlap; Electivity; Search rates; Fishery; Flow diagram; and the EwE Network Analysis plugin).
