

### 6.15 Off-vessel price

Enter the market value (in the specified monetary unit per unit catch) for each group for each gear (fleet). It is not important whether the market values are entered in, e.g., Euro/kg or Euro/tonnes, as long as the entries are consistent among groups.

The off-vessel prices are fleet-specific on the entry forms, as quality and hence price varies more between fleets than within fleets. See also [Non-market price](#).
