Creating PDF documentation of Wiki Pages

This page describes how to create PDFs from Ecopath Users Guide Wiki pages. The WikiPrint plugin is customized specifically for Ecopath Users Guide. You will have to be an administrator inorder to do this task.

i. Go to Admin -> WikiPrint -> MakeBook.
ii. Add **Ecopath 6 User Guide** in Book Properties -> Title
iii. Select Output Format as PDF article
iv. In the UserGuide? page, select edit and Copy the content between the parenthesis in TOC.
v. Paste the content in a text editor and remove the white-spaces
vi. Recopy the content without the white-spaces and paste the content in the textbox above **Create**
vii. Click **Create**

This process should take 5-10 minutes, so have your coffee and it should be done when you get back.
