MSE Batch plugin user notes

10 Sept, 2010

Overview

The MSE Batch plugin allows you to run the MSE module in batch mode from a command file. The command file runs the MSE module changing input parameters for each iteration and outputting data file.

Command file inputs

i. Number of MSE simulations
ii. Assessment and Implementation error
iii. Primary Production forcing function
iv. Primary Production forcing function variation
v. Fleet Control type
vi. Harvest rules
    i. Fishing Mortality
    ii. Total Allowable Catch
    iii. Target Fishing Mortality (hockey stick parameters)
vii. Ouput data
