Running Ecopath 6 Solution

This tutorial will help you run the Ecopath 6 solution.

i. Open the file [Ecopath_dev]\Ecopath6\Sources\EwE6.sln where [Ecopath_dev] is where you downloaded your sources. *Note: if you are running Visual Basic Express, you will get a message saying folders are not compatible; ignore this message.*

ii. In the Solution Explorer (by default on the right), browse to the Project *Scientific Interface*.

iii. Right click on *Scientific Interface>Set as Startup Project*. This will tell the compiler you want to run this application.

iv. Hit F5 to run the application.
