Technical FAQ

Software requirements

To obtain the source code of EwE 5 and 6, you will need the following:

- A Subversion client such as ?TortoiseSVN
- Log-in access to this site (please contact us if you need this)
- SVN repository settings

To compile the source code of EwE, you will need:

- Microsoft Windows XP or newer. The EwE6 sources are not ?MONO compliant.
- ?Microsoft Visual Basic 6 for EwE5.
- ?Microsoft Visual Basic Express or ?Microsoft Visual Studio for EwE6.
- ?Microsoft Jet Engine 4.0 for using the MDB drivers. Native to Windows XP and newer.
- ?Microsoft 2007 Office drivers for using ACCDB database drives. Installed with Office 2007, and native to Windows Vista and newer.
