

Welcome to Ecopath

Welcome to the Ecopath with Ecosim (EwE) Wiki. This Wiki is divided into 3 main sections:

- EwE6 user resources
- EwE6 beta testers resources
- Building onto the EwE6 engine

We hope to support your endeavours as much as possible. Please do not hesitate to contact us with questions, concerns, suggestions, or if you need access to the source code of EwE versions 5 or 6.

Best regards,
The EwE Development Team

PS: since this is a true Wiki, we encourage you to update the content of this wiki with us to ensure accuracy. Please do not hesitate to share your experience working with EwE and the EwE sources.

EwE6 user information

EwE version 6 is under ongoing development. This section provides you access to the status of this development:

- [EwE6 user manual](#) - The EwE6 user manual, in Wiki format.
- [Error reporting](#) - Let us know about errors that you encounter, and track the solution of known errors in EwE6.
- [Tips and tricks](#) - Tips and Tricks on the usage of EwE6.
- [Missing Features?](#) - An overview of features that are not yet implemented in EwE6.
- [To do](#) - An overview of pending change requests for EwE6.
- [?Change log](#) - An overview of changes and bug fixes of each major EwE6 release.

EwE6 beta test program

The Ecopath development team would like you to participate in the [beta testing program](#). In brief cycles, two to three times per year, you will be asked to work closely with the development team on the latest version of the software to prepare EwE6 for a next release.

EwE6 developer information

The EwE6 source code is freely available upon request. This section aims to provide you with resources that would help you develop your own code using the EwE6 source code.

- [Getting started](#) - Instructions on how to get started with the EwE6 source code.
- [Basic tutorials](#) - Small projects that demonstrate different ways to use EwE6 code.
- [Plug-in tutorial?](#) - Basic tutorial on developing an EwE6 plug-in.
- [Ecopath Online tutorials](#) - Tutorials on using EwE6 web services across the Internet.
- [Technical FAQ](#) - FAQ, download links and resources that may aid you in your efforts.
- [?API documentation](#) - EwE6 Application Programming Interface (API) documentation.

The EwE6 source code is compiled daily around UTC/GMT 11am (2am in Vancouver, Canada) to verify integrity. Registered developers can see the status of the latest build [here](#).

If you experience problems compiling your own version, please check the following link:

- [EwE6 source code compiler errors FAQ](#)

Complete list of local wiki pages, see [TitleIndex](#).
